Be a long-term investor

The Power of Compound Interest

What if I save £3 per day (a coffee...) and invest £1,000 per annum for next 20 years and achieve 7% annualized returns?

What if I invest £20,000 per annum for next 20 years and achieve 7% ('optimistic') annualized returns?

What if I invest £20,000 per annum for next 20 years and achieve 5% ('realistic') annualized returns?
